COVID-19 is not only a medical science issue, but it is also a critical issue for other experts such as social scientists, economists, technologists, psychiatrists, statisticians, sociologists, policymakers, politicians, and administrators, among others. Therefore, it is important to make collective efforts to deal with this pandemic. Interdisciplinary research is one of the best ways to achieve this. Interdisciplinary research is capable of bridging traditional divides between disciplines and also combines research excellence with relevant impact. Interdisciplinary research should be treated as policy research. The quality of the interdisciplinary research

present book, authors from diverse backgrounds have expressed their views on this specific problem. They have contributed their ideas on how the pandemic has affected every aspect of human life, including education, economics, social life, finance, information technology, etc.
