About Workshop

Brief note about theme of workshop

IoT devices are the nonstandard computing devices that connect wirelessly to a network and have the ability to transmit data, such as the many devices on the internet of things (IoT). IoT involves extending internet connectivity beyond standard devices, such as desktops, laptops, smartphones and tablets, to any range of traditionally "dumb" or non-internet-enabled physical devices and everyday objects. Embedded with technology, these devices can communicate and interact over the internet. They can also be remotely monitored and controlled.

Example of an IoT device

Connected devices are part of an ecosystem in which every device talks to other related devices in an environment to automate home and industry tasks. They can communicate usable sensor data to users, businesses and other intended parties. The devices can be categorized into three main groups: consumer, enterprise and industrial.

Consumer connected devices include smart TVs, smart speakers, toys, wearables and smart appliances. In a smart home, for example, devices are designed to sense and respond to a person's presence. When a person arrives home, their car communicates with the garage to open the door. Once inside, the thermostat is already adjusted to their preferred temperature, and the lighting is set to a lower intensity and color, as their smart watch data indicates it has been a stressful day. Other smart home devices include sprinklers that adjust the amount of water given to the lawn based on the weather forecast and robotic vacuum cleaners that learn which areas of the home must be cleaned most often.

Call For Registration

Dear All,

Greetings !!We are pleased to inform you that the Department of Electronics and Communication Engineering is organizing a National Workshop on "IOT and Smart Devices (IoTSD 2022)" scheduled from 21st-26th, November 2022 (in Offline mode) There is no registration fee. Projects will be implemented on the following themes.

- *Smart Automation
- *Security System
- *Power supply
- *Smart Irrigation system
- *Health Monitoring System

Projects competition will be held among the students team and the winning team will be awarded by exciting prizes.

Certificate: certificates will be provided to those who will attend the session, participate in competition and submit feedback on time.

Interested students may join through given link:

Technical Report of Workshop

One-week Student workshop on Internet of Things and Smart Devices (IoTSD-2022) witnessed its inaugural ceremony at Swami Keshvanand Institute of Technology Management and Gramothan, Jaipur on Monday, 21st November 2022.

The workshop was organized by the department of Electronics and Communication Engineering, SKIT Jaipur in association with Enovate Skill, Chandigarh and CSIR-IMMT:InTec, Bhubaneswar.

The coordinators of this event were Dr. Rukhsar zafar , Dr. Swati Arora , Ms. Manju Choudhary ,Ms. Pooja Choudhary , Mr. Lalit Kumar Lata and Mr. Sunil Lakhawat

The program was graced by the benign presence of chief guest Mr. Gunjan Saxena, Dy. Director General, Department of Telecom, Rajasthan and Chairman of I.E., Rajasthan State Chapter and Guest of Honor Mr. Ajay Godara, CEO, Enovate Skill, Chandigarh. Professor S L Surana, Director (Academics), SKIT welcome the guests and inspired the gathering with his words of motivation. Mr. Gunjan Saxena highlighted the role of engineers in the nation development and focused about the importance of IoT in the daily walk of life. He also emphasized that how the theme of the workshop is relevant in the context of development in all around the world. Mr. Saxena also shared that the Electronics stream finds its vital involvement in all other streams and motivated the students to give their active participation in progress of nation. The guest of honor, Mr. Godara introduced the participants with the key findings of his work in the field of internet of things and also informed about the number of concerns and the risks in the growth of IoT technologies and products, especially in the areas of privacy and security. Prof. Mukesh Arora, Head, ECE Department, SKIT and Head-OFA, SKIT extended the vote of thanks and conveyed the best wishes to the participants.

In the session of the first day **Mr . Ajay Godara** delivered hands-on session on Arduino and different electronics sensors. The participants got a lot of experience to using Arduino on the platform on TinkerCad.

Second day was yet energetic and started again with hands-on session under guidance of **Mr. Ajay Godara** who shared his expertise on ESP-8622 WiFi based microcontroller. It was quite knowledge enriching session. The session also follows knowledge of Humidity and temperature sensor along with uploading the data on cloud i.e., thinkspeak.

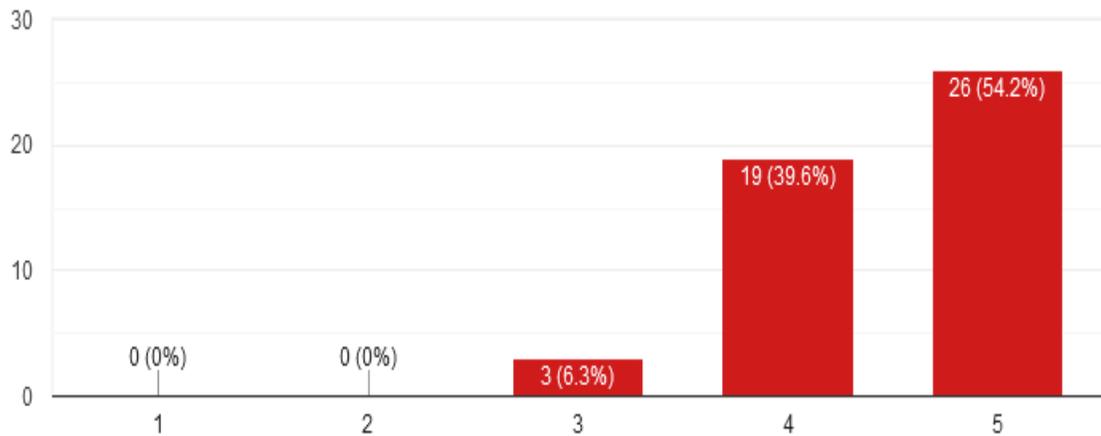

Technical Report of Workshop

Third day was started with much awaiting event i.e. Project competition based on IOT and Smart devices . It gave opportunity to all the participants to design attractive projects. Students participated enthusiastically in the competition.

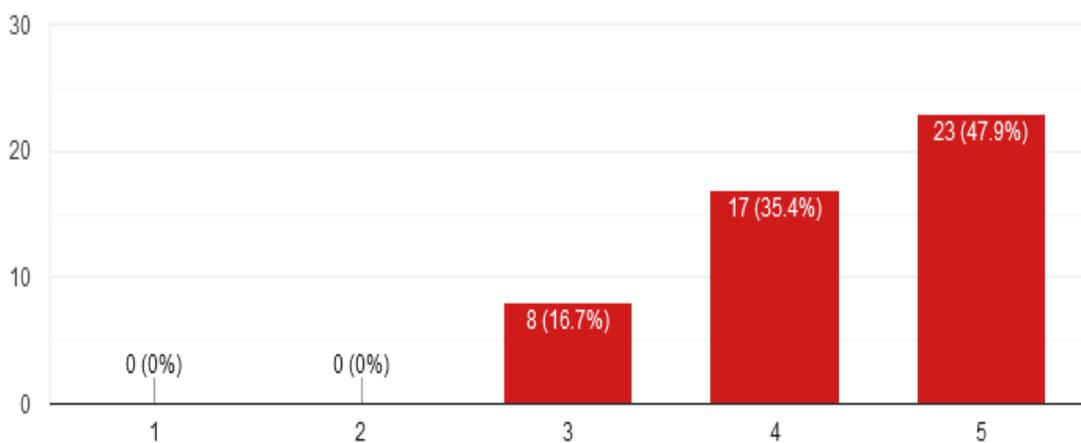

Making the views meaningful, the Day 4 was began with Lecture taken by Mr. Dinesh Kumar. He enlightened the participants with his expertise in Transformers, Rectification, Filtration & Regulation. The day ended with a hands-on session on transformers and also Project demonstration of an auto curtain & Fan auto speeding using binary. Finally the workshop was ended with valedictory ceremony.
