Notice

Sub: Green painting competition

The IGBC Student Chapter is organizing a *Green Painting Competition*. This competition aims to encourage and promote the use of eco-friendly and sustainable materials in the field of art.

As participants, you will have the opportunity to showcase your artistic skills while also learning about the importance of sustainable practices in the art industry. The theme for this year's competition is "**sustainable ecosystem restoration**" and we encourage you to incorporate elements of environmental sustainability in your artwork.

The winners will be chosen based on their artistic merit and their ability to incorporate sustainable practices in their artwork. Prizes will be awarded to the top two entries.

We look forward to your participation in this exciting event.

The date and venue of the event are April 21, 2023 (times 9–12).

Venue: CAEG Lab Civil Block

For more details and to participate in the event, register at the link mentioned below:

Sub.: Permission for visit of Water Treatment Plant at Bisalpur Dam

Dear Sir,

Civil Engineering Department is planning a visit of water treatment plant at Bisalpur Dam. There will be around 60 students of VI semester section - 'A' and 4 faculty members. This visit will benefit the students in understanding various water treatment units and its working in the WTP, which will enhance their knowledge of the core subject Environmental Engineering. The proposed date of visit is April 15, 2023 from 8:00 AM - 8:00 PM. We would be requiring:

1. One Bus (seating capacity 51) on 15.04.23 from 8:00 AM-8:00 PM. Toll tax and fare charges will be paid by students as per institute norms.
2. A sum of Rs. 1500/- as cash advance for Expenditure of tea/lunch for faculty members is required.

Kindly may approve the same.

- Bus fare & toll tax will be paid by students.
- Pls. allow/approve a sum of Rs 1500/- for tea/lunch of faculty/staff members

STUDENT CHAPTER

INDIAN GREEN BUILDING COUNCIL (IGBC)

**Swami Keshvanand Institute of Technology, Management
& Gramothan, Jaipur - 302017**

Objective of the event: -

Surajpura Water Treatment Plant Visit was organized on 15th April 2023. The aim of the site visit was to learn the operation and maintenance of water treatment plants. This WTP is a state-of-the-art plant, only one in Rajasthan, and among the select few in India, based on the relatively lesser known and little unconventional Pulsed sludge blanket technology. The maintenance of the water treatment plant is being done by GCK Projects and Works Pvt. Ltd.

Details (Execution): -

The learnings from the following visit were:

- Different processes involved during water treatment process.
- Chemicals usage and dosage at various processes of water treatment process.
- Distribution of Water from Surajpura.
- Sludge treatment.

SKIT, M&G, Jaipur

Sub: Requisition for availing bus facility

Dear Sir,

With reference to the above cited subject, the Department of Civil Engineering is arranging a site visit to Ghat ki Guni tunnel and Lal Garh (Tunga) for the students of B.Tech. II Year Section A and B on 16/09/2022. We will depart from the Institute at 9:00 am and will return back by 06:00 pm.

The total number of students participating for the activity are 105. Dr. B.L. Sharma, Mr. Manmohan Sharma, Mr. Vikash Vyash, Mr. Sitaram Saini, Ms. Sunita Tolani and Ms. Leena Narula along with me will be assisting for the visit. All the faculty members have no teaching load during this time.

Kindly permit to conduct the tour and provide 3 buses of total seating capacity 112 for the visit from 9:00 AM to 6:00 PM. Other arrangements will be done by students.

Thanking you,

Regards,

Dr. B.L. Sharma
Professor, CE Deptt. SKIT

Objective of the Event: -

The objective of a geology camp for engineers is to provide engineers with a solid foundation in geology and geological processes that are relevant to their field of work. The camp aims to enhance the engineers' understanding of the Earth's composition, structure, and geological hazards, enabling them to make informed decisions and design projects that are geologically sound and sustainable. Some specific objectives of a geology camp for engineers may include:

- Geological Awareness
- Site Assessment and Characterisation
- Geotechnical Engineering
- Geological Hazards
- Field Skills

Event banner:-

Objective of the event: -

The students conducted the task of problem identification and solution designing at Ranipura Village.

Details (Execution): -

On 10 September 2021 students visited a village named Ranipura. The time of the visit was from 9am to 11am and the purpose of visit was to research on the necessary improvements required by the village and villagers. This visit was done under the supervision of our professors and also the visit was organised under IGBC (Indian Green Building Council).

| Problems | Solution |
|---|--|
| No Paved Roads | A proper bituminous or concrete road should be built there with speed breakers on certain distances and also road signs which can tell them about the speed breaker or turn. |
| Improper Drainage System | We should make sure that water flows away quickly and smoothly and is disposed of in a surface watercourse or soakaway. Drainage installed by one community should not create problems for other communities downstream, nor should it affect ecologically important sites and also according to me environmental considerations should be given adequate attention. |
| Do not have waste water treatment facility | The sewage water pipelines should be connected to an underground pipeline system which will take the water to the sewage water treatment plant where the water will be treated and the treated water will be supplied back to the villagers so that they can at least use that water for irrigation or some other works rather than drinking |
| Lack of Electricity | Government has launched some programs like “PRADHAN MANTRI SAHAJ BIJLI HAR GHAR YOJNA” which can help getting supply to the village houses also better power and grid management, balancing supply and demand, increasing system reliability and also according to me solar panels can be a very good option for villages in Rajasthan mainly. |
| No Place for Street animals | A place or shelter should be provided for the animals and a vet, a keeper and a guard for their safety, security and proper living. If not, then these animals should be given to some NGO or other institutions which can do care of them. |
| No proper place for storing water | “Rain Water Harvesting” is the best practice they can use in their houses and also in the big buildings (e.g., School). |
| Lesser School and Hospital facilities | Awareness program should be conducted for the parents as well as the children of the villages as they are unaware of future opportunities and importance of knowledge and education. |
