1: 30 pm – Session ends. With such plethora of technical expertise in cloud and devops it was understood that most of the things as takeaway from the session were not bounded for the minds of the student even then he tried to keep session interesting and memorable for us. We are thankful for the same to him. A token of gratitude (momento) was presented to him by Ms. Manju Choudhary mam.

1:30 pm to 2:00 pm We wrapped up our event with photos and queries from participants to sir.

### **Feedback of the event:**

My senior and faculties organised this event very well and I want to thank our guest speaker for giving us insights on tools, development terms, positions in companies for engineers, on how work happens in companies like Cvent. Stories and Memes of working in fast paced environment helped us understanding professional scenarios well. I am sure that this whole experience of youth talk session is something to be shared and remembered with friends and while entering for placements too.

Important points were when sir talked about how skills differentiate you among other students. Also the punch line in the end “raise your voice beyond the noise”.
