Poster of the Workshop

Schedule of the Workshop

Date	Time	Theme
09-10-2024	2:00-3:30 PM	FIGMA

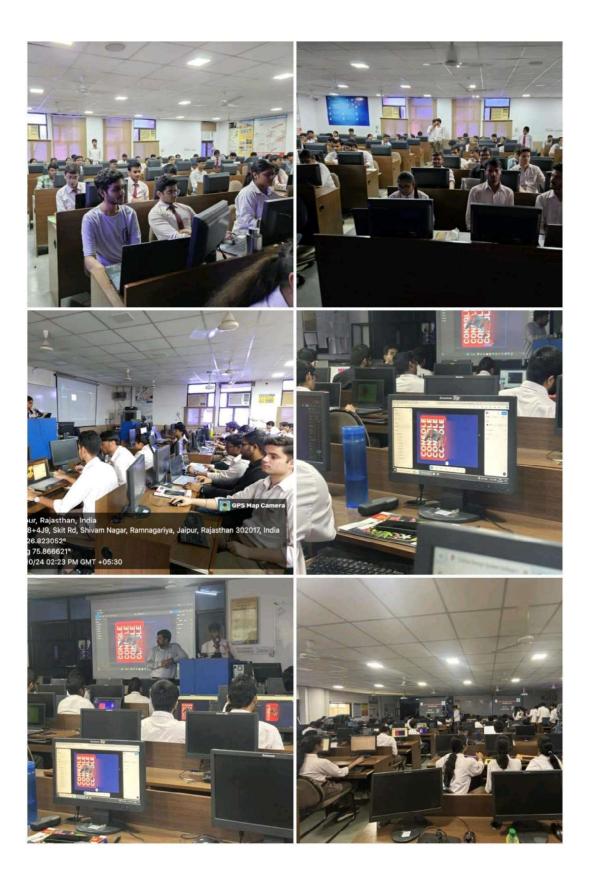

Content of the Workshop

The Figma workshop is an interactive session where students learnt to use Figma, a collaborative interface design tool. This workshops covered topics like UI/UX design, prototyping, and collaboration techniques, helping attendees enhance their design skills and teamwork capabilities.

About Workshop

Semiconductor IC (Integrated Circuit) fabrication is a highly sophisticated and precise process that forms the foundation of modern electronics. It involves creating integrated circuits, which are small, complex arrangements of transistors, diodes, capacitors, and resistors on a silicon wafer. The process begins with the preparation of ultrapure silicon, typically derived from sand, which is shaped into wafers. These wafers serve as the substrate upon which intricate circuit patterns are constructed. Fabrication involves several key steps, including photolithography, doping, etching, and deposition.

Photolithography uses light to transfer patterns onto the wafer, defining the areas where specific materials will be added or removed. Doping introduces impurities into the silicon to alter its electrical properties, enabling the formation of transistors. Etching removes layers of material to create the circuit's intricate structures, while deposition adds thin films of conductive or insulating materials.

The fabrication process occurs in cleanrooms to avoid contamination, as even microscopic particles can ruin the delicate circuits. The circuits are built layer by layer, often requiring hundreds of steps to complete a single wafer. After fabrication, the wafers undergo testing and are diced into individual chips. Each chip is encapsulated to protect it and to provide connections to external circuits. The result of this process is a semiconductor chip, which powers a wide range of devices, from smartphones and computers to cars and medical equipment. Semiconductor fabrication is critical to technological innovation, enabling the production of increasingly smaller, faster, and more efficient electronic devices. It is also a capital-intensive industry, requiring advanced machinery, skilled expertise, and significant investment in research and development. As a cornerstone of the global economy, semiconductor manufacturing drives advancements in virtually every sector.

Content of the Compitition

The UI Designing Compitition is a compitition where students showcased there UI Designing talent using Figma, a collaborative interface design tool . The designs of the participants were on the theme "Redesign a popular app or website". This compititon encourages students to know about designing and prototyping .

Details/list of invited guest/speakers:-N.A

Objective of the event:

- PseudoCode –

The primary objective of organizing the Pseudocode competition is to enhance students' problem-solving skills and logical thinking by encouraging them to develop structured and efficient algorithms. This event aims to bridge the gap between theoretical knowledge and practical implementation by focusing on the fundamentals of programming without syntax barriers. Through this competition, participants will improve their algorithmic thinking, optimize their coding approach, and prepare for real-world problem-solving scenarios, fostering a strong foundation for future technical challenges.

Details (Execution): -

The Pseudocode Competition will be conducted in a single-round written format, testing participants on their problem-solving abilities, logical thinking, and algorithmic approach.

Competition Format:

- Participants will be given a set of problem statements.
- They must write the pseudocode to solve each problem efficiently.
- Some questions may include error identification and debugging in a given pseudocode.
- Time limit: 60–90 minutes (depending on the complexity of questions).

Event Flow & Execution:

- 1. Setup & Coordination:
 - A total of 5 coordinators were stationed at 5 different locations.
 - The Phones of the participants were taken by us and kept aside.
 - Each participant was given an answer sheet, pen.

2. Game Start:

• Each participant was given a question paper which they have to attempt within 90 minutes.

Feedback of event: -

The Pseudocode Competition was a successful event that enhanced students' logical thinking and problem-solving skills. Participants tackled engaging challenges, showcasing structured approaches and optimization techniques. While evaluation was fair and transparent, improvements like better difficulty balance and clarification sessions could enhance future editions. Overall, it was an enriching learning experience.

Details of winners/prize distribution: -

Sr. No.	Name	Univ. Roll no	Position
1	Tarushi Sharma & Gopal Tiwari	23ESKCA114, 23ESKEC036	Winner
2	Aaditya Parashar	24ESKCA002	Runner Up

Glimpses of event: -

News of the event: -

The Pseudocode Competition was successfully conducted, attracting enthusiastic participants eager to showcase their problem-solving skills. The event featured engaging challenges, testing logical thinking and algorithmic efficiency. Judges ensured fair evaluation, and participants found it enriching. The competition concluded on a high note, promising an even better edition next year.

Certificates (Add certificates of all winners):-

Swami Keshvanand Institute of Technology, Management & Gramothan, Jaipur

Objective of the event:

- UI Designing -

The UI Designing Competition fosters creativity, innovation, and technical skills by challenging students to create intuitive, user-friendly interfaces. It enhances proficiency in design tools, problem-solving, and user-centric design. This competition bridges theory and practice, preparing students for careers in UI/UX design while promoting collaboration and industry-relevant skills.

Details (Execution): -

UI Designing Competition – Details & Execution (One Round) Competition Details:

- Theme: Participants will design a UI for a given problem statement (e.g., a mobile app, website, or dashboard).
- Participants: Individual or team (max 2-3 members).
- Time Limit: 2-3 hours.
- Tools Allowed: Figma, Adobe XD, Sketch, or any UI design tool.
- Judging Criteria: Creativity, usability, aesthetics, responsiveness, and adherence to UX principles.

Execution Plan (One Round):

- 1. Briefing (15 mins): Participants receive the problem statement and guidelines.
- 2. Designing Phase (2-3 hours): Teams work on their UI using the provided tools.
- 3. Submission & Presentation (30 mins): Participants submit their designs and give a brief explanation of their approach.
- 4. Judging & Results (30 mins): Judges evaluate the designs based on criteria, provide feedback, and announce winners.

This single-round format ensures a focused, efficient, and engaging competition while testing participants' creativity and design skills under time constraints.

Feedback of event: -

The UI Designing Competition was a success, fostering creativity and UI/UX skills. Participants showcased innovation, engagement, and design expertise. While execution was smooth, suggestions included more design time, mentorship sessions, and industry involvement. Overall, the event provided valuable practical exposure, enhancing students' problem-solving abilities and preparing them for real-world design challenges.

Details of winners/prize distribution: -

Sr. No.	Name	College Name	Position
1	Suhani Mathur	GIT	Winner
2	Vidhi Soni	SKIT	Runner Up

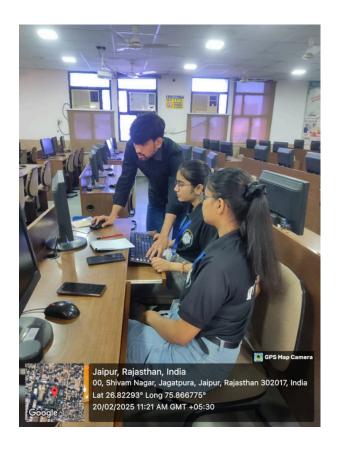

Glimpses of event: -

News of the event: -

College Hosts Successful UI Designing Competition, Showcasing Student Creativity

The college recently organized a UI Designing Competition, bringing together talented students to showcase their creativity and technical skills. Participants designed innovative user interfaces based on real-world problem statements using tools like Figma and Adobe XD.

The event saw enthusiastic participation, with students demonstrating impressive UI/UX design abilities. Judges evaluated entries based on creativity, usability, and aesthetics. The competition provided hands-on experience and practical exposure, preparing students for careers in UI/UX design.

Organizers received positive feedback, with suggestions for future improvements like mentorship sessions and extended design time. Overall, the event was a resounding success, inspiring students to innovate in the field of UI design.

Certificates (Add certificates of all winners):-

Swami Keshvanand Institute of Technology, Management & Gramothan, Jaipur

(An autonomous institute affiliated to Rajasthan Technical University, Kota)
