Introduction: The goal of this workshop was the training of methodologies and tools for Volumetric analysis.

Basic objective of this workshop is to present on Titration or Volumetric Analysis. Titration is a common laboratory method of quantitative chemical analysis that is used to determine the unknown concentration of a known reactant. Because volume measurements play a key role in titration, it is also known as volumetric analysis. Titration is the slow addition of one solution of a known concentration to a known volume of another solution of unknown concentration until the reaction reaches neutralization, which is often indicated by a color change.

Location and period of the workshop: The workshop was held in Chemistry Lab – II, on Tuesday 8th March 2022 in two sessions.

Session I : 9 AM to 11AM

Session II : 12 PM to 2 PM

Opening:

The overall goal of the training workshop was to introduce participants to methods for volumetric analysis, the training gave insight in estimating the strength of the unknown solution.

The persons in charge was Dr. Anurag Sharma. The training workshop was opened at 9:00 a.m. with a welcome statement by the HOD Chemistry Dr Sharda Soin followed by the statement of program Coordinator Dr Anurag Sharma and an opening speech held by the HOD Dr Sharda Soni . Afterwards Dr Anurag Sharma thanked to member of workshop for organizing the workshops. Finally he wished all participants a good and successful training workshop.
