Objective of the event:-

In today's life, everybody suffers under stress in one or the other way. Yoga has always been known as **a way to calm the mind** through the **combination of movement and breath**. This, in itself, is a way to **help manage stress**. Even further benefits have been found because yoga has been proven to have a [positive effect on the parasympathetic nervous system](#). This **reduces the amount of oxygen that your body needs, resulting in the leveling out of your heartbeat and blood pressure**. In short, this system **controls the stress response systems**. One of the main principles of yoga is to **connect the body and mind**. Stress can affect both and yoga helps to balance and connect the body and mind. Considering all these benefits of yoga, this workshop was organized for students, staff and faculty members of SKIT.
