After II Wave of covid, institute was open in partial mode of online and offline. Mostly activities of the UHVEC were done on online mode. Workshops / FDPs/ Seminars/ on UHV & ETHICS, code of conduct were organized for students, Faculty members and non teaching staff members of Institute. People appreciated events and agreed that such type of programmes are very important for awareness and all round development of the students. All the stake holders must know code of conduct of the institute. Many events were organized which were giving awareness/ message of Constitutional obligations: Values, Rights and Responsibilities.

We show our respect, we congratulate, we float messages on various occasions and festivals. Certain festivals were celebrated too. Most of the commemorative days of National and International importance were celebrated. UHVEC successfully conveyed its message to all the family members of SKIT that Nation building can be done with values is sustainably.

Day 2

4. Correlation between Ethics and Spirituality

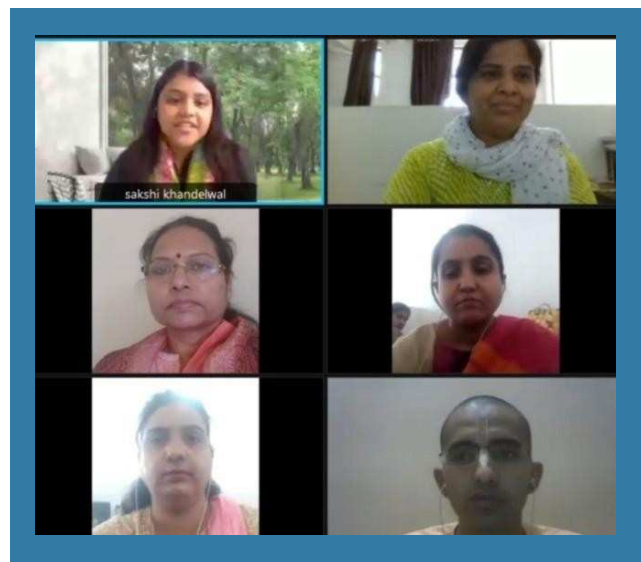

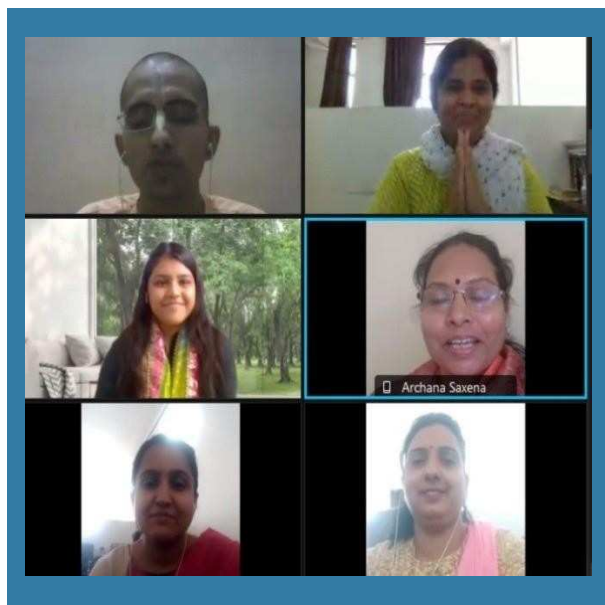

The Bhagavata Purana explains that even though one may follow religious ethics for some time, without genuine devotion to the Lord the subtle desires in the heart, which are the roots of immoral tendencies, are not destroyed and will rise again. Only pure devotion can remove all immoral tendencies. This is described in the Bhagavata:

*lecit kevalaya bhaktiya
voodeva parayana
agham dhuravanti karitanyena
nibharani ke bhakarani*

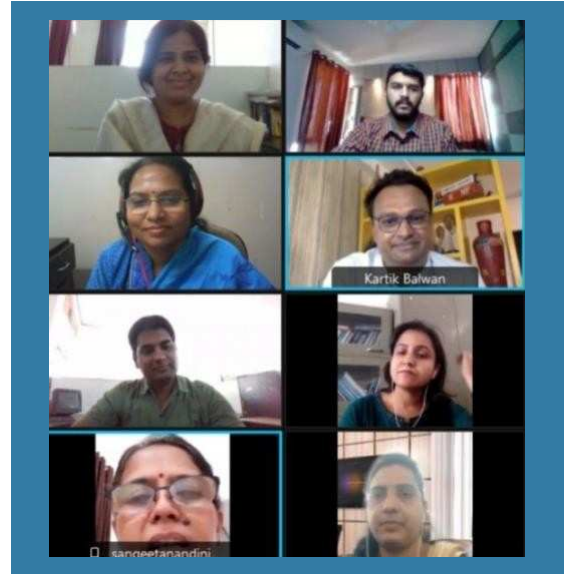

"Only a rare person who has adopted complete, unalloyed devotional service to the Supreme Lord Vasudeva, Krishna, can uproot the weeds of sinful actions with no possibility that they will revive. He can do this simply by discharging devotional service, just as the sun can immediately dissipate fog by its rays."

Teaching itself is the noble profession and teachers have responsibility to nurture its students to make them knowledgeable, competent, sensible & responsible citizens. All the commemorative days of national and international importance are also celebrated by the committee.

OBJECTIVES OF WORKSHOP

1. To enhance the ability of the students.
2. To inculcate morality amongst students.
3. To develop spiritual and emotional quotient among students.
4. To develop a spirit of unity and solidarity .

ABOUT THE WORKSHOP

We all agree that education is at the core of developing the people, who are the society. If the education is right, the resulting society will be harmonious and fearless; otherwise it is just a crowd or even a battlefield where man's greatest fear is the inhuman conduct of man.

The present workshop on human values aims at leading the students to introspect and discover for themselves what they really want. The various sessions of the workshop will draw attention of the students to major issues and will also enable them to distinguish between the essential and the superficial; eventually developing their understanding regarding their family, workplace and then society. The motto of the workshop is to help the students understand their purposefulness or goal, both as an individual, as well as a Humane society, and to develop the commitment & competence to fulfill these goals.

So its mostly related to human behaviour. And it increase our thinking ability and decision making power so we can do difference between right or wrong things easily. The real beauty of person based on human values that shows our thoughts, words and action. This is what I feel required in all the humans to be the way they want and give their best with their values and that is what makes you a real person.

<p>On every 14th of december, we celebrate National Energy Conservation Day. To ensure and spread awareness about the use of resources. Once Mahatma Gandhi quoted that, "There is is availability of resources for everyone's need, but not anyone's greed."</p> <p>Nowadays, people around the world are exploiting resources with thinking about future. One should always remember that we have not not get the resources by our ancestors but have borrowed from our upcoming generation.</p> <p>There are alot of ways by which we can conserve our energy resources at domestic and institutional level. Such that we can conserve our environment and control global warming. Increasing global warming is causing a lot of destruction in our environment and that this is a high time that we must think about it. At domestic level, we can conserve energy resources by using solar power plants instead of electricity generated by ^{thermal} coal power plants. We can also try to maximum switch off the lights when not in use and also can try the LED bulbs. and appliances. I would also like to add that people at home should minimize usage of electronic devices &</p>		

switch to ecofriendly. At institutional level, we can conserve ~~electr~~ energy sources by various means. Specially students may participate in saving resources. One way is to ~~use~~ minimize the usage of laptops/Desktop Computers for sending mails, etc. Students/Staff Members can use their phones/Androids to do the same. Since, the smaller the electronic devices the lesser the usage of electronic device. My point is that we can minimize the usage of bluetooth earphones/speakers/laptops/smartphones for the useless stuff. There is alot more that we can do to save our energy resources. Also, the institute can run a solar power plant to supply/use electricity. Moreover, the use of ducts instead of AC can be used in premises to ensure the minimum usage of electricity & also in ~~the~~ controlling global warming. Even one can make sure that the appliances are working properly and efficiently to make the power loss minimum. People at ~~domestic~~ homes can ~~not~~ ~~use~~ harvest the ~~rain~~ rainwater and can save it for future use. Nowadays, Greedy use of resources or misuse of appliances are the ~~major~~ reasons for exploiting and finishing of resources. One can use bicycle or can walk for a short distance to save petroleum resources. Also, government can establish dams on the ~~evergreen~~ ~~rivers~~ everflowing rivers and also which is further use to produce electricity. ~~At~~ last but not least, I would like to request for the stoppage of wasting energy resources and want everyone to use resources in a limited way and in a proper way.

CONSERVE RESOURCES TO CONSERVE ENVIRONMENT AND
TO CONTROL GLOBAL WARMING.

"Essay Writing"

Introduction :->

The term energy conservation means to conserve the energy i.e, reducing the consumption of energy by different methods / forms that can make it, the not beneficial to the nature and that can make our environment ^{somehow} ecofriendly.

How can we conserve energy:

Energy can be conserved by many ways that includes less use of electrical appliances i.e, we should always switch off the appliances if we are not using them. So we must not waste the energy in unnecessary things. We can make the people aware about the benefits of energy conservation and about the need of it for us as well as our future generations also.

As we all know that the energy can neither ~~destroy~~ be created nor be destroyed. So it is that form that is available in the nature for our use and so hence we must try to make the best use of it by not wasting it but by using it for the works that are related to mankind and also try to save it as much as possible by applying the most possible ways.

Energy Conservation at Domestic level / Institutional Level:

We can conserve energy by whenever we are not using lights or fans. whether we are at home, school / college, or any other place we should always switch them off. At home, there are so many electrical appliances that, some of them are used on daily basis and some of them are used occasionally. So just try to save the energy by using them ^{only} whenever we need them. rest of the time we should just save let them rest.

The government of India has ~~not~~ ^{put} a lake electricity tax ~~with~~ from all the people of India / citizens of India. So, the tax include how many electricity does our home's appliances consume and for how much time and then they get the amount that then shows on the meters which is outside every house. Then we need to pay that tax every month. This whole record is recorded in every city, state or small village of India. In Jaipur and the cities that are around Jaipur and that comes under JVNRL. The full form of JVNRL is Jaipur vidhyut.

Conclusion: →

Every citizen of India also the citizens who does not belong to India should try to make ^{their} best efforts to reduce the consumption of energy and conserving it for our future generations also. And should practice to adopt methods like water energy, solar energy, wind energy which never harm our environment and are good for us.

- 4) Energy conservation:- Need, ways and means.

(4) ENERGY CONSERVATION - NEED, WAYS & MEANS

* Energy Conservation ; as the name suggests ^{the} ~~in~~ ^{presence of} our natural treasure. Almost everyone around us know much about energy conservation & could give a handsome speech on it but what about the execution of their thoughts & ideologies. In today's scenario, Conservation of energy has become a major task. But what are we doing about it? Just dwelling. This pandemic time in such a short span had taught us life's biggest lessons. But still we are not gearing up. ~~Energy Conservation does not~~ Conservation of Energy not always requires big steps ; it can also be achieved at smaller level. As we all know natural resources takes millions of years for formation & we just to satisfy our greed ~~at~~ use them ruthlessly.

* Energy conservation is not only required for future generation but also to satisfy the needs of present generation. Various energy resources such as coal, petroleum are on a verge of extinction. A very interesting question arises now, why were the Britishers attracted towards our country? The answer is very simple due to large presence of natural resources. Energy conservation just requires the judicious use of present available resources so, as to save it for future generation. Depletion of Energy nowadays is also leading to many environmental causes such as Global Warming, Acid Rain, Ozone layer depletion & what not. This is high time for us to understand our duty & responsibilities towards our environment & start working for it.

Energy could be conserved on various levels like.

→ COMMERCIAL LEVEL

On a commercial level we see that there is high wastage of natural resources by industries due to improper use of resources available to them. This can be fixed by being more vigilant & responsible & adopting modern techniques for industrial requirements.

→ SOCIETY LEVEL

On a society level, we can make sure that people around us plant more no. of trees, use solar electricity etc. There can be various events organised to aware people about the same.

→ HOUSE HOLD LEVEL

At a house hold level we can ~~see~~ keep an eye on electricity consumption. We can install rain water harvesting techniques. We can open our windows to get fresh air rather than using fans during spring season.

* Mahatma Gandhi once quoted "Earth has enough to satisfy ~~everybody~~ everyone's need but not anyone's greed." Sustainable use of energy can lead our Nation towards path of success.

Detail Execution:

The Celebration all began with an energetic play of National Anthem. It was an hour short event hosted by the **Anchor**-“*Aryan Mishra*” and wonderful Patriotic **poem** by *Priya Gupta*.

The 1st performance was a short **Speech** by ‘*Vishal Bansawal*’ and ‘*Divya Nyati*’ which made all of us aware about the true meaning and importance of celebrating Republic Day.

After that the 2nd performance was of ‘**Patriotic Songs**’ by 1st year students: ‘*Avishi Vijay*’, ‘*Shilpi Shukla*’ & ‘*Aanvi Bhatt*’. The inevitable performance had enriched the environment with sweet melodies.

Then their comes the turn of most awaited **Dance** Performance by ‘*Aashi Kushwah*’ and ‘*Samridhi*’ which had filled the environment with great thrill and excitement.

Meanwhile during the session, the encouraging words of “*Dr. Nidhi Sharma*” mam had nurtured the true spirit of all the participants throughout the journey. With that the use of *shyaries* and *slogans* of ‘*Vande Matram*’ & ‘*Bharat Mata ki Jai*’ by the team members of UHV&EC had helped out in maintaining the enthusiasm of the participants till the end.

At last the **Poem** recitation by ‘*Aarushi*’, ‘*Garvita Sakhrane*’ and ‘*Chahak Khurana*’ had impetrated the feeling of Patriotisms in all the attendees and made all of us realise about the sacrifices our Freedom Fighters had gone through inorder to enrich our Beautiful Nation.

Eventually the whole event certainly proved to be a complete mixture of all sort of Entertainment mixed with feeling of Nationalism and and helped out in invoking true sense of Nationality in all of us.
