“Circular Economy- Switching from Linear Economy to Circular Economy, Using Recycling and Minimizing Waste”

March 9th, 2019 (Saturday)

About the International Conference

Today's economic model of "take, make, dispose" is reaching its physical limits and must be replaced. In the circular economy, the aim is to keep the value and utility of products, materials and components as high as possible for as long as possible. The winners of tomorrow will be the companies that are able to create more value out of less resource. This demands an innovative mindset, a long-term perspective, new business models and willingness to collaborate.

In view of the environmental, economic and social challenges facing our current society, the DMS-SKIT is determined to offer a space for balanced discussions, guidelines and for helping make the right decisions, to be taken today to preserve the generations of tomorrow. The International Conference focuses on how the circular economy can create value for businesses and society, and will include speakers from academia and private industry. Central topics are circular design, business models for a circular economy and innovation through collaboration.

What is this International Conference for?

- What are the challenges and opportunities of the new plastics regulation?
- How can waste management companies get prepared and benefit from the revised legislation?
- What is changing regarding the calculation of recycling rates and how to measure recycling in the future?
- How to encourage waste prevention and communal recycling initiatives?
- What are best practices of waste separation, collection and treatment of food and bio-waste?
- How to facilitate the separate collection of bio-waste?
- What are the new changes regarding “extended producer responsibility”?
- What demands poses the monitoring system on public authorities?
