ACKNOWLEDGEMENT

We are deeply thankful to all those who helped us to come up with this wonderful project. A few words of thanks mentioned here would be in no way for the effort that they have put.

We owe our special thanks to "Dr. Nidhi Sharma" for giving this wonderful and life changing opportunity to us.

We are also grateful to our team "THE SOCIAL CIRCLE" for extending their hands in giving valuable suggestions and for providing required

Sources to make the project on "SLUM AREA". We are grateful to all to give us this project as this provides a base for including essential human values.

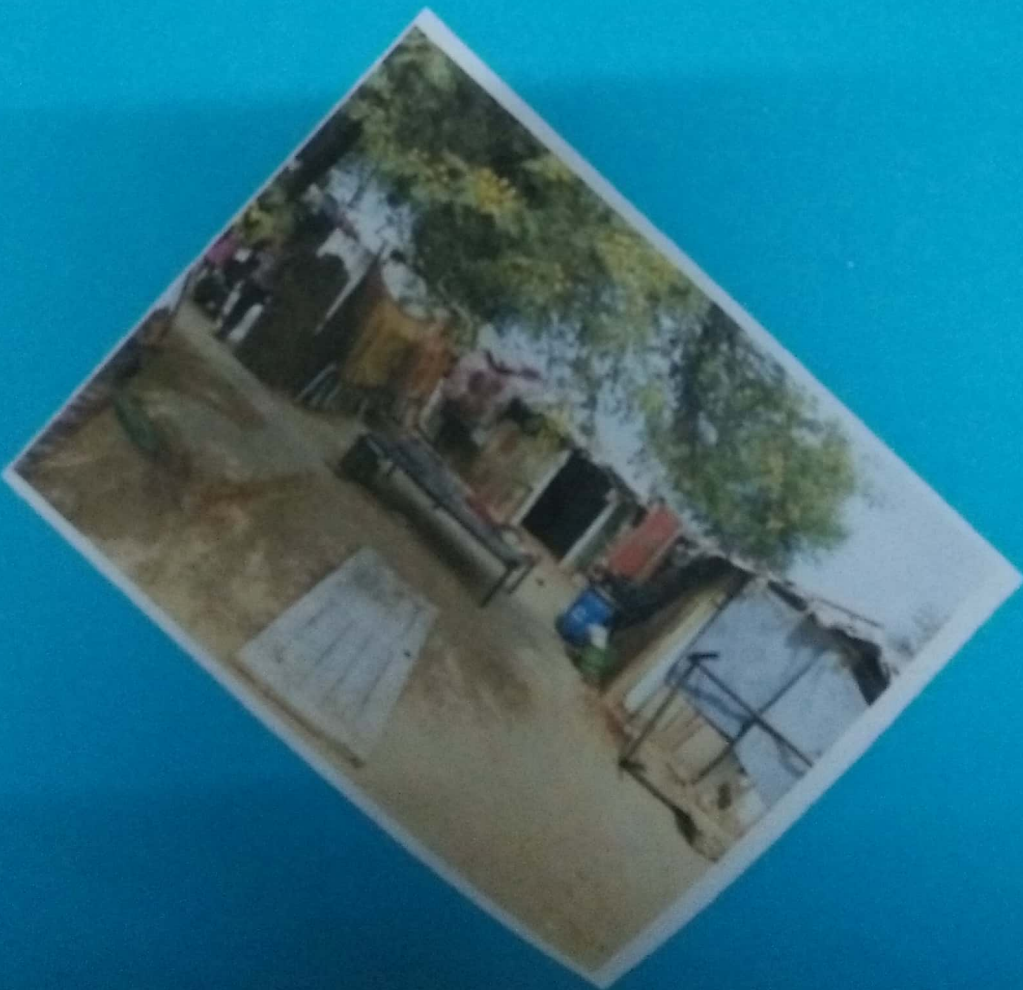

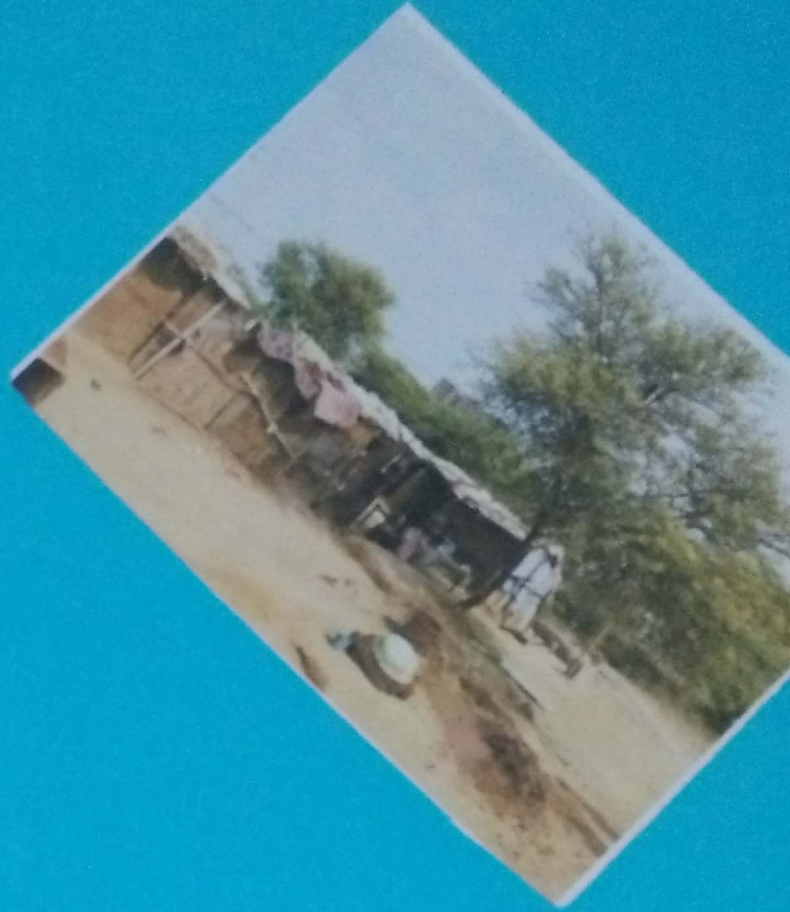

At last but not the least, we would like to thank all those SLUM AREA children who co-operated with us in making this project an epic one in our life.

Slum Area

Regarding our project of surveying we visited a slum area which is situated in sector 19, Pratap Nagar. Near the slum there is one government hospital, a temple, and a school named Mother Teresa. It was a shelter for so many people especially many small children. The area was reflecting the bitter truth of society i.e. poverty very well. which is a major problem in our country India. The slum is situated over there since last three years.

Living Conditions

The slum was highly populated and consisted of shanty houses, decrepit housing units in a situation of deteriorated infrastructure. They live in a very poor condition over there. All the members living there work as metal workers i.e. they hammer big metallic parts into smaller ones. such as the doors (of metal), windows etc. They live in very unhygienic conditions. They don't even have sufficient water to drink. They have to go far away to get water from a borewell which is also very hard to operate. They all are living over there since last three years.

"SLUM areas are the service sector of smart city, It is not like to be Ignored."

"THE SLUM IS THE MEASURE OF CIVILIZATION"

Reasons of slum formation

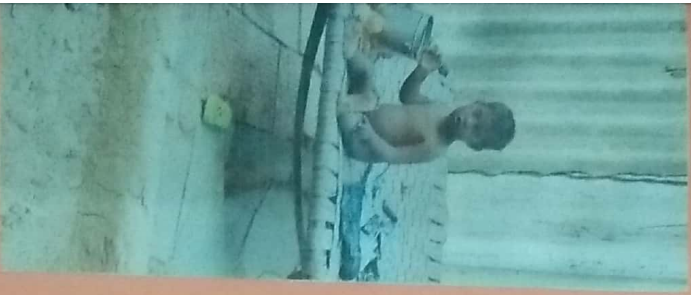

The slums form and grow in different parts of the world because of -

- Rapid rural - to urban migration.
- Economic stagnation and depression.
- High unemployment
- Poverty
- Informal economy
- Poor planning
- Politics
- Natural disasters
- Social conflicts

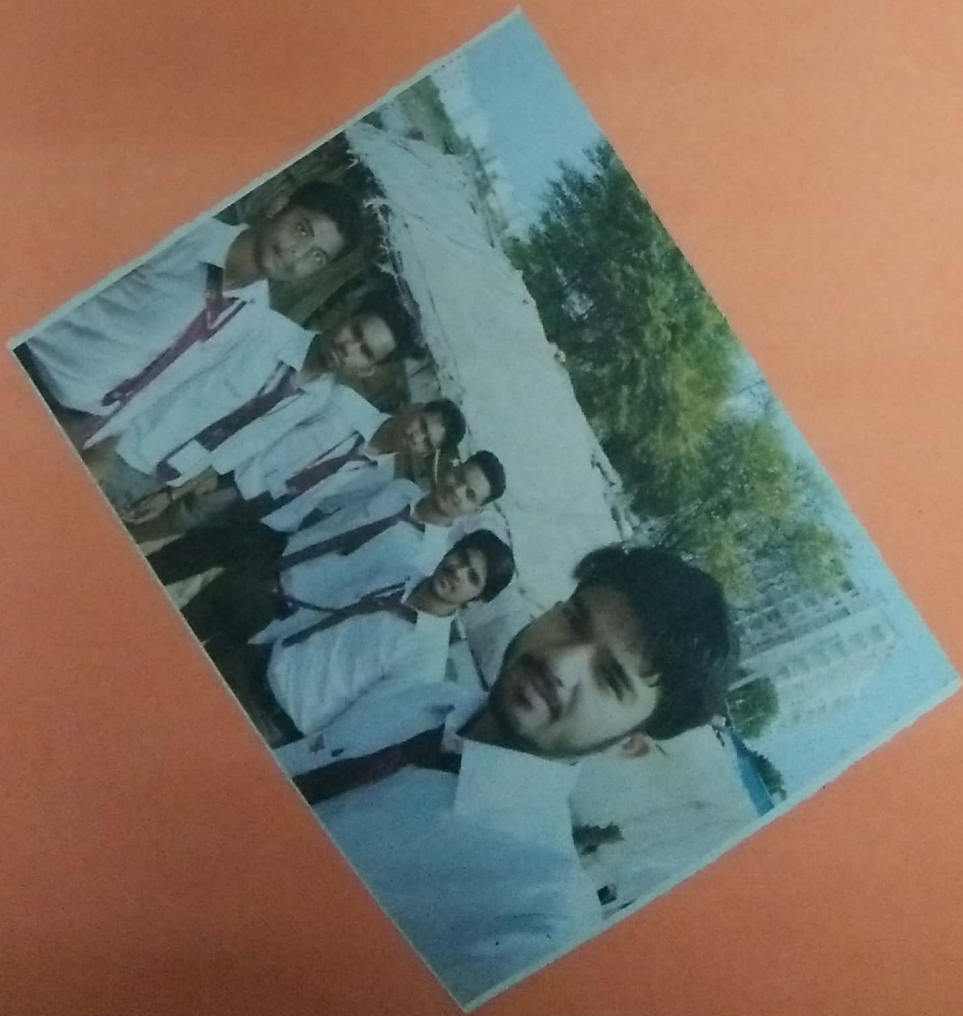

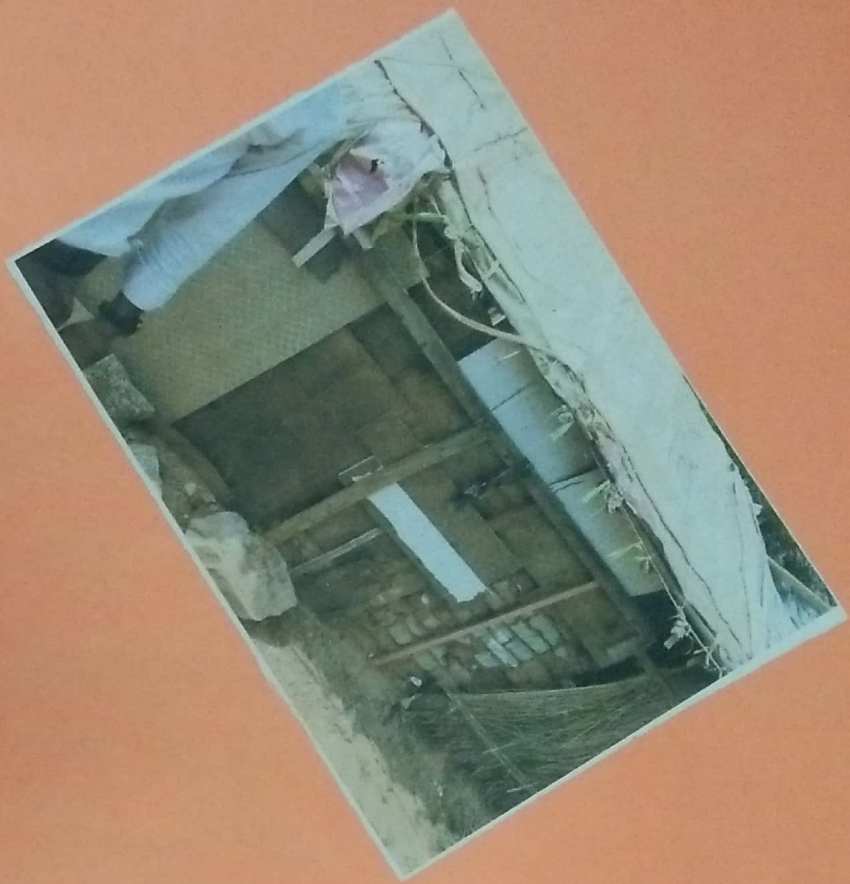

Problems faced by them

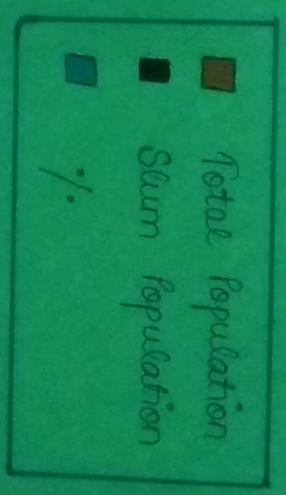

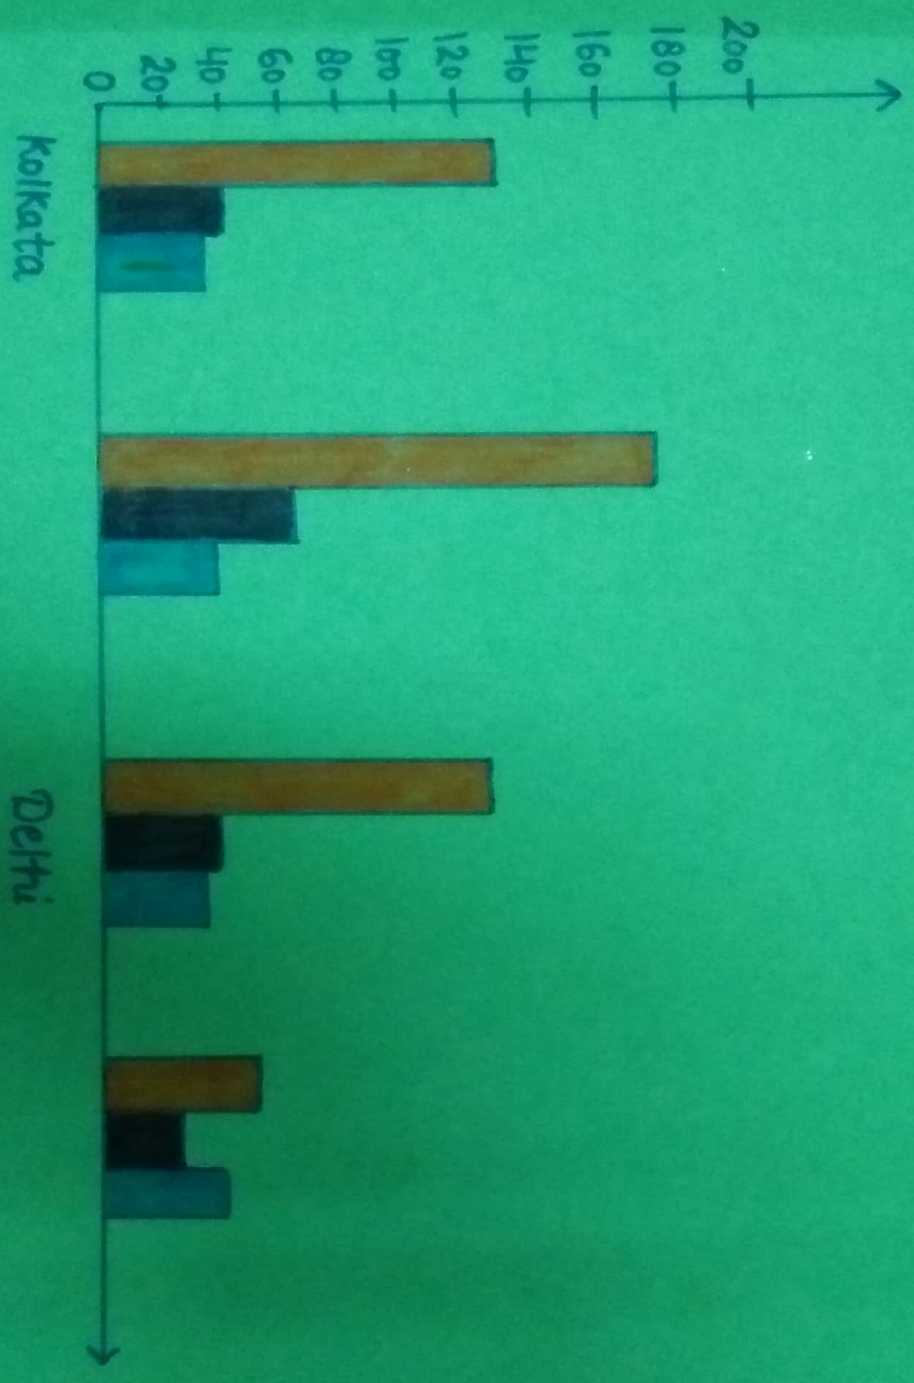

We are scared of even small problems in our life but they, including children face a lot of problems of which we can not bear even a single one.

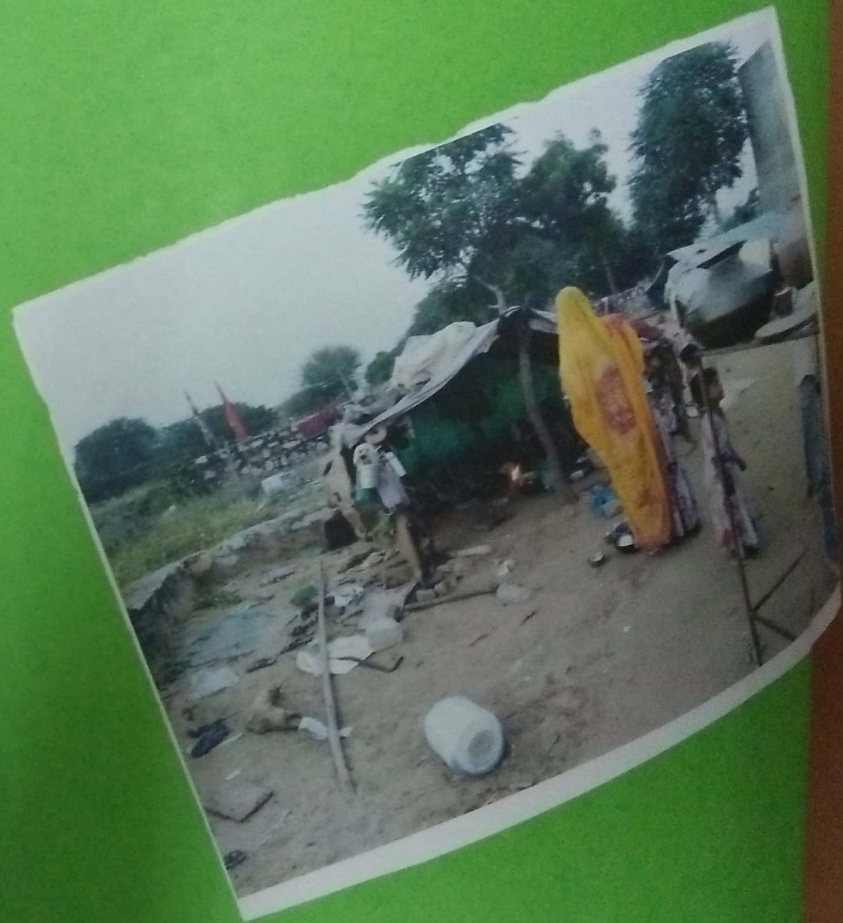

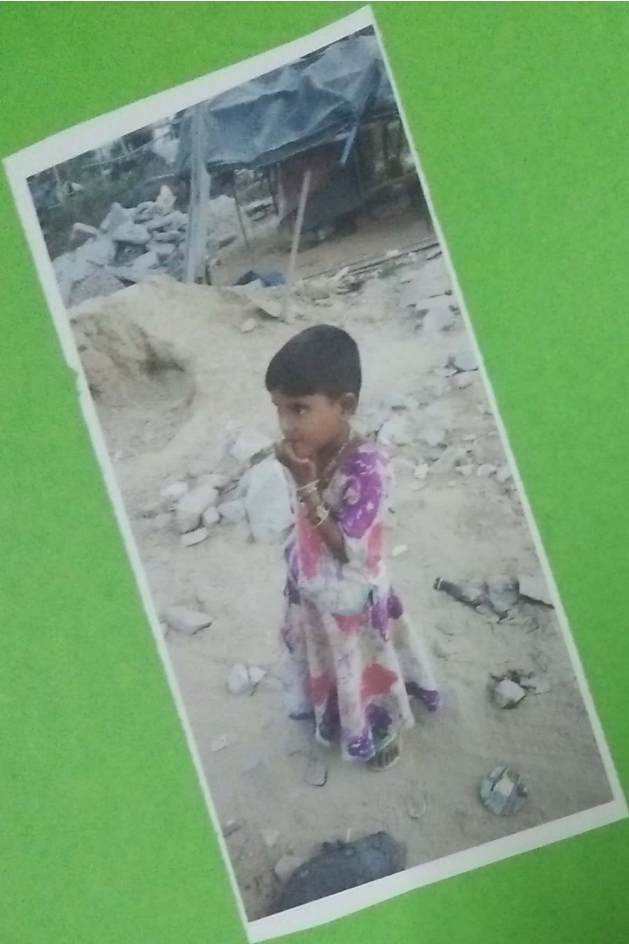

- They don't have proper availability of water. Women living over there have to go far away to a boring for water.
- Surrounding environment is very unhygienic which leads to their poor health conditions.
- They can't afford the fees of school and hospitals even.
- After doing such a work of metal hammering, they are able to afford something to eat.
- They are tortured to leave the place by some people of government which leads to a huge damage. They lose whatever they have.
- Frequent changing of places make them to have their own identities.

Slum Population in 4 Metros in India -

SLUMS IN INDIA

Population in Slum -

Around 65 million Indian citizens lived in slums as the last census in 2011. Of course, the number is a bit higher today. India has the large slum population in its big cities like Mumbai and Delhi.

'Chawari' is a locality in Mumbai, Maharashtra, India. This slum is the second largest in Asia. After 'Gangi' (in Pakistan) 'Chawari' has an area of just over 21 square kilometers.

Almost half the world's urban population lives in slums. Asia has the largest number of slum dwellers overall, with 554 million, while sub-Saharan Africa has the largest percentage of its urban population living in slums - about 71 percent.

A Man With Ambitions

Where everyone uses talking about their hopes, we found a man whose dreams, us and will are still alive. The man in 'see' in the picture is the one. He calls dream for earning some money. He said,

I used to go school situated nearby but after tenth my parents were not having sufficient money so I had to leave the school. Now I sell ice-creams. We all suffer here very much. The major problem is of water and this becomes a hell for us in summer. We can't even keep ourselves clean. When we try to live happily, a new problem arises in front of us, of leaving the place and searching for new. People come and start breaking our belongings which leads to the misplacing of our past documents also. After that we face a lots of problems in a process of remaking. No one is there to help us so we only have to depend ourselves. We only have to take a stand and work hard to improve our condition. Definitely, one day we will be in better condition."

A RAY OF HOPE

In the world of selfish thinking, there is one person who thinks selflessly for the well-being of the children in school. She is

Jayanti Sharma. From Madras Siva Somaiya which works for the well being of poor people the user amazed that in today's world also such types of persons exist. When we started to hire she said, "I like to help others as I am a part of Madras Siva Somaiya and as a part of it I come here daily at 4:00 pm with one of my colleagues to teach these children. I just want to see them reaching the heights and in

future they don't have fear whatever they are facing in this small age. If atleast these these students also get success in their lives then that will be a true happiness for me. I can say that I have done something good in life."

Solutions to their problems

- Proper identification of their problems.
- Empowerment of women
- Proper access to healthcare
- Surroundings should be clean.
- Creating jobs.
- Providing them permanent space to live.
- Education
- Creating organizations and communities to work locally.

MY EXPERIENCE

It is as a very different experience of my life. This experience brought me many things. I focus a little bit of the society I learned from them. How to find

happiness in small things, what are the values of small things in our lives what we face for granted. Happiness on these focus concept. It is about the problems faced by them. They are for better than us. We are for ourselves and they live for each other.

In all these our progress was there when we are not. We are using ourselves. We would that we should not have any help from others. Whatever is to be done is by us only. We have not want. We are not others. We are well. We are the only help to our success. Other than him. We are teacher. We are taught. We are being that we are happiness is good than the happiness given to us. Whatever we give you. You will get much better than that. We are should help the needy ones because it will give them. We are best and happiness to us. Which will have power.
