"VLSI Design and Embedded Systems (VDES-2020), 21st Sept to 25th Sept 2020"

Title of the activity: VLSI Design and Embedded Systems (VDES-2020)

Objective:

VLSI Design and Embedded Systems techniques are the main pillars of most of the present research, industrial and commercial activities in Electronics Engineering. This is a student centric training program which focuses on basic design techniques using VLSI Design Tools & Software. It also focuses on embedded system techniques such as Microcontroller Programming, Circuit Building and Arduino programming.

The objectives of this program are as follows:

- To expose the participants to various modelling, simulation and design techniques, applied to contemporary problems in the field of VLSI Design and Embedded Systems.
- To train the engineering students with latest software and hardware
- To provide a forum to exchange and stimulate new ideas
- Online hands on training sessions on Xilinx, Arduino, raspberry pi.

a. Program detail:

The Student Workshop on **VLSI Design and Embedded Systems** was jointly organized by Rajasthan Technical University, Kota & Swami Keshvanand Institute of Technology, Management & Gramothan, Jaipur from 21st Sept 2020 to 25th Sept, 2020. This Student Workshop was fully sponsored by RTU (ATU) under Technical Education Quality Improvement Program Phase III (TEQIP-III) and conducted on Webex online platform. In this workshop 622 students from different institutes of the country have participated in this workshop.

In the inaugural session of the workshop, Dr. Alpana Aagarwal, Professor and Head of Department, Electronics and Communication Engineering, Thapar Institute of Engineering

and Technology, Patiala, Punjab was the chief guest.The workshop began with the welcome address by Prof. Mukesh Arora (Professor & Head ECE Deptt, SKIT M& G) in his speech he talked about the importance of VLSI Design and Embedded Systems techniques as these are the main pillars of most of the present research, industrial and commercial activities. Dr. Swati Arora (Coordinator) enlighten about all the sessions of workshop. In the Inauguration Prof S.K. Bhatnagar (Director (Research), SKIT), Prof. Praveen Kumar Jain (Professor & Dy. Head, ECE Deptt.) and Dr. A Rajani, JNTU Coordinator were also present. Dr. Alpana Agarwal encouraged students to work in field of AI and IC design, motivated them to be job providers in their domain and gave pristine suggestions in this respect. She talked about the importance of enhancing knowledge and skills in field of VLSI Design and Embedded Systems. Mr. Ankit Agarwal, Coordinator of the event given vote of thanks to all the dignitaries and organizers of workshop.

In the first session of the first day Mr. Divneet singh kapoor, Sr Developer, ESRR, Chandigarh delivered an expert talk on Introduction to IoT and connecting to cloud. He enlighten that how with the help of sensors data can be collected executed with actuators and can be stored in cloud. He explained the process by doing arduino coding on real time data and uploading on cloud server through ubidots. In the second session Dr. Amit M Joshi, Assistant Professor, MNIT Jaipur, enlightened the participants with the introduction of Xilinx and FPGA. He explained the importance of hardware language in industries. The day one is ended with the final session of Mr. Ankur VIjay, Design verification Engineer-II,Xilinx india technology services pvt. Ltd . He shared his knowledge on Xilinx Software. It was a hands-on session for students where experts walked through all the steps of software and also explained that how to use it for hardware programming with help of examples.

Commencement of second day was enthusiastic and informative due to an expert lecture of Mr. Anshul Sharma, Sr Developer ESRR Chandigarh. He shed light on the IoT Case studies: weather station and intruder detection. He explained about different sensors and their use for solving real life issues. He explained with help of pressure, humidity and temperature sensors by coding thorough arduino programming and hosting PHP applications and mysql database. Dr. Alpana Aagarwal, Professor and Head of Department, Electronics and Communication Engineering, Thapar Institute of Engineering and Technology, Patiala, Punjab and Mr. Ankur

VIjay, Design verification engineer-II,Xilinx india technology services pvt. Ltd also shared their knowledge on Introduction to VLSI (Digital and Analog flow) and hands- on session of Xilinx Software respectively on the subsequent sessions of Day2.

Day 3 started again with the knowledge enriching session of Mr. Anurag Sohane Sr. Developer, PSWave Pvt. Ltd. He enlightened students with the introduction of Proteus software and few hands-on practical examples. The session is followed by an expert talk by Prof. Mohit Sinha, professor BML, Munjal University. He shared his knowledge on the basics of embedded system. He highlighted the importance of enhancing knowledge on 'Embedded Systems: An integrated approach and IoT and its relation to the engineering stream'. Day 3 was ended with a hands-on-practice session of Pyhton Programming in this session Mr. Saurabh Bhardwaj, Co-Founder, TechiNest shared his valuable and also taken a hands-on Practice session on Pyhton 3.8 software.

Day 4 began with interactive session of Mr. Anurag Sohane Sr. Developer, PSWave Pvt. Ltd. The session was dedicated to hands on practice of Arduino simulation with proteus which is followed by two more practice session on Raspberry pi and Arduino. These sessions was convened by Mr. Saurabh Bhardwaj, and Mr. Ajay Godara, Director, Enovate skills respectively. During these sessions various projects ideas related to these topics were discussed and practically shown to students and on the other hand students took great interest in the sessions and enquired all their queries and problems from the experts and got satisfactory answers from them.

Day 5 was started with the much awaiting hands on session of Real time interfacing with Arduino which was delivered by Mr.Anurag Sohane. This lecture is followed by two more hands-on session on Arduino. Mr. Ajay Godara, Director, Enovate skills enlightened the gathering during this practice session. He explained various projects, issues related to it and to how to resolve them. He also explained interfacing of arduino board with WiFi. This was indeed an informative session. Majority of sessions in the worshop were based on hands -on practice so that students can get practical knowledge about different technologies and work on them in future. It will be a life-long learning for them.

The discussed areas are of great benefit for the students as they are enlightened with the most widely used advance strategies in VLSI Design and embedded systems. Feedback of the FDP was collated from the participants.

b. Outcome: The outcome of this workshop was to provide knowledge of basic design techniques using VLSI Design Tools & Software and embedded system techniques such as Microcontroller Programming, Circuit Building and Arduino programming to students.

What is an Embedded system?
• An embedded system is one that has computer hardware with software embedded in it as one of its components. Or
• We can define an embedded system as "A microprocessor based system that does not look like a computer".
Or
• we can say that it is "A combination of computer hardware and software, and perhaps additional mechanical or other parts, designed to perform a dedicated function. In some cases, embedded systems are part of a larger system or product, as is the case of an antilock braking system in a car ".
